AREA SUMMARY:  
LIBRARIES SERVING 10,000 TO 24,999 PEOPLE

NOTES & DEFINITIONS

GROWTH FACTOR	2010 service population / 1999 service population
GROWTH AREA	Additional space needed to provide current level of services for population anticipated for 2010 Calculated by multiplying the growth factor times current area, then subtracting current area
FUNCTIONAL NEEDS AREA	Additional area required to meet today’s program needs Needs identified by librarians; space calculated by applying standard unit allocations Note that requests for additional shelving area for existing collection types have been included with “growth” needs; only shelving for new collection categories is listed in this section.

<sup>1</sup> Because American Fork recently moved into a new library facility, no functional needs were identified. The design for the new facility included capacity for growth, so the 2010 total need identified here, which is calculated by multiplying current area by the growth factor, is probably higher than actual need.

<sup>2</sup>Service populations and holdings listed for bookmobile libraries include only data from the county in which the fixed facility is located, although the library may provide mobile service in multiple counties.

<sup>3</sup> The Emery County Library System includes facilities at Castle Dale, Cleveland, Elmo, Emery, Ferron, Green River, Huntington, and Orangeville.

<sup>4</sup> Because the data do not show a population increase for Hyrum, this model suggests that the library has no growth needs. In fact, however, demand for library services in this community has grown rapidly, and the library is planning for a major expansion to meet that demand.

<sup>5</sup> Because no current area was provided for Kaysville, growth area as identified in this model cannot be calculated. Population in the service area, however, is projected to increase, with a growth factor of 1.08.

<sup>6</sup> The San Juan County Library System includes fixed facilities at Blanding and Monticello.

<sup>7</sup> The Summit County Library System includes fixed facilities at Kimball Junction, Kamas, and Coalville. Because the county recently moved into a new main library at Kimball Junction, no current functional needs were identified.

<sup>8</sup> Because the Tooele City Library recently moved into a new facility, no current functional needs were identified.

<sup>9</sup> The Tooele County Bookmobile Library has fixed facilities at Stansbury Park and Grantsville.

AREA SUMMARY:  
LIBRARIES SERVING 10,000 TO 24,999 PEOPLE
